

ASHISH KUMAR KEWAT

Pega Developer | Programmer Analyst

Kolkata, West Bengal, India • ashishkewat370@gmail.com • +91 8009209634 • [linkedin.com/in/ashishkewat370](https://www.linkedin.com/in/ashishkewat370)

PROFESSIONAL SUMMARY

Certified Senior System Architect (CSA & CSSA) with 2 years on the Pega PRPC / Infinity platform. Skilled in end-to-end case management design — case types, case lifecycles, flows, flow actions, activities, data transforms, decision and declarative rules, report definitions, SLAs, queue processors, and job schedulers — built to Pega guardrail best practices. Experienced in REST integrations via connectors, services, service packages, and data pages. Proven contributor to production support, defect management, and incident resolution within Agile teams. Seeking Pega Developer roles where deep BPM and workflow-automation expertise drives measurable business impact.

TECHNICAL SKILLS

Pega Platform: Pega PRPC (v8.x / Infinity 23), Pega Platform, BPM & Workflow Automation, Case Management, Case Lifecycle Design, Case Types, SLAs, Guardrails Compliance, Pega Constellation, Pega GenAI

Pega Rules & Automation: Flows & Flow Actions, Activities, Data Transforms, Decision Rules, Declarative Rules, Report Definitions, Data Pages, Queue Processors & Job Schedulers, Reusable Rulesets, Migration

Pega Architecture & Integration: Enterprise Class Structure (ECS), Layer Cake Design, Class Structure & Inheritance, Connectors & Services (REST), Service Packages, REST APIs, Integration Mappings, Case Management Automation, BPM Best Practices

Pega Debugging & Support: Tracer, Clipboard, PLA, Application Debugging, Defect Management, Root Cause Analysis, Production Support & Incident Management

Backend & Data: SQL, Oracle DB

Tools & DevOps: Git/GitHub, GitHub Copilot, Postman, Jira, Eclipse/IntelliJ, SDLC, Agile

Cloud & AI: Oracle Cloud Infrastructure (AI Foundations), Applied GenAI Tooling (Claude, GitHub Copilot) for developer productivity

PROJECT EXPERIENCE

Programmer Analyst — Pega

Aug 2025 – Present

Cognizant | Kolkata, India

- Design and configure Pega case types, flows, and case lifecycles to automate business workflows, reducing manual process handling time by an estimated 30% across supported applications.
- Build reusable Pega rulesets, data transforms, decision rules, and report definitions aligned to guardrail best practices, improving rule reusability and cutting redundant configuration effort across case types.
- Configure queue processors and job schedulers to automate background and asynchronous processing, improving throughput and reliability of long-running case operations.
- Develop REST-based integrations using Pega connectors, services, and service packages to exchange data and ensure reliable system-to-system communication.
- Collaborate with cross-functional Agile teams and stakeholders to analyze requirements, refine user stories, and deliver within sprint timelines.

Programmer Analyst Trainee — ADM (Pega / Java Standards)

Aug 2024 – Aug 2025

Cognizant | Kolkata, India

- Configured Pega flows, flow actions, and UI rules under senior guidance, supporting delivery of case management enhancements on live applications.
- Contributed to production support, defect management, and incident resolution, performing root cause analysis using Pega Tracer, Clipboard, and log review to resolve defects and reduce ticket backlog.
- Authored technical documentation and knowledge-based articles that accelerate onboarding and standardized troubleshooting for recurring issues.

Intern — Application Development & Maintenance

Dec 2023 – May 2024

Cognizant | Chennai, India

- Gained hands-on exposure to enterprise SDLC, ADM practices, and Java development standards within a live application support environment.
- Developed the MFRP project with application support tasks, defect triage, and testing, building a strong foundation in enterprise delivery.

Subject Matter Expert (Q&A) — Computer Science

Apr 2024 – Feb 2025

Chegg India | Remote, India

- Resolved technical student queries across programming and computer science topics, delivering clear, accurate explanations and reinforcing core engineering fundamentals.

Research Intern (Fully Funded)

Oct 2022 – Feb 2023

Yuan Ze University | Taoyuan City, Taiwan

- Supported research experiments and technical documentation on a fully funded international internship, strengthening analytical and problem-solving skills.
- Learned and applied Machine Learning under Prof. Chih Yang Lin.

KEY ACHIEVEMENTS

- Certified across Pega architecture— System Architect (CSA v23) & Senior System Architect (CSSA v25)— validating advanced Pega design and workflow-automation capability.
- Adopted GenAI developer tooling (GitHub Copilot, Claude) to accelerate coding, debugging, and documentation, boosting individual delivery throughput.

CERTIFICATIONS

- Certified Pega System Architect (CSA) — v23
- Certified Pega Senior System Architect (CSSA) --v25
- Anthropic Claude Foundations Certification
- GH-300 GitHub Copilot Certification
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Boomi Associate Integration Developer Certification
- 5-Day AI Agents Intensive Course with Google (Certificate of Attendance)

EDUCATION

B.Tech Computer Science & Engineering May 2019 – May 2023

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology, Chennai

Secondary School (Physical Sciences)

Apr 2017 – Apr 2019

Mani Mukunda Secondary School
