

# ASHISH KUMAR KEWAT

Programmer Analyst | Pega Developer | Java Spring Boot Backend Developer

Kolkata, West Bengal, India | ashish.kewat2@cognizant.com | +91 8009209634 | [linkedin.com/in/ashishkewat370](https://www.linkedin.com/in/ashishkewat370)

## PROFESSIONAL SUMMARY

Programmer Analyst at Cognizant with 3+ years delivering enterprise Application Development and Maintenance (ADM) across the Pega PRPC platform and Java/Spring Boot backend stack. Certified Pega Senior System Architect and System Architect with hands-on experience designing case management workflows, automating business processes, and building reusable, rule-based enterprise applications. Complements Pega expertise with strong Java, Spring Boot, REST API, and microservices development for backend services and system integrations. Proven contributor to production support and incident management within Agile teams, translating stakeholder requirements into stable, maintainable solutions. Seeking internal Pega Developer, Application Developer, or Backend Developer opportunities where deep BPM and Java engineering skills drive measurable business impact.

## TECHNICAL SKILLS

**Pega Platform (Primary):** Pega PRPC (v8.x / Infinity 23), Case Management, Case Lifecycle Design, Flows & Flow Actions, Decision & Declarative Rules, Data Transforms, Activities, Case Types, SLAs, Reusable Rulesets, Class Structure & Inheritance, Guardrails Compliance, Application Debugging (Tracer, Clipboard, PLA)

**Pega Architecture & Integration:** Enterprise Class Structure (ECS), Layer Cake Design, Connectors & Services (REST/SOAP), Integration Mappings, Data Pages, Agents & Job Schedulers, Case Management Automation, Workflow Automation, BPM Best Practices

**Java & Spring Boot (Secondary):** Core Java, Java 8+ (Streams, Collections, Functional Interfaces), Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Microservices, Dependency Injection, Exception Handling, JUnit

**Backend & Data:** SQL, Oracle DB, Relational Data Modeling, Hibernate/JPA, JSON, API Integration, Backend Service Design

**Tools & DevOps:** Git/GitHub, GitHub Copilot, Postman, Jira, Eclipse/IntelliJ, SDLC, AI Agents

**Cloud & AI:** Oracle Cloud Infrastructure (AI Foundations), Applied GenAI Tooling (Claude, GitHub Copilot) for developer productivity

## PROJECT EXPERIENCE

### Programmer Analyst — Pega & Java Application Development

Aug 2025 – Present

Cognizant | Kolkata, India

- Design and configure **Pega case types, flows, and case lifecycles** to automate business workflows, reducing manual process handling time by an estimated 30% across supported applications.
- Build **reusable Pega rulesets, data transforms, and decision rules** aligned to guardrail best practices, improving rule reusability and cutting redundant configuration effort across case types.
- Develop **REST-based integrations using Pega Connectors and Services** to exchange data with downstream Java/Spring Boot microservices, ensuring reliable system-to-system communication.
- Optimize **SQL queries and JPA data access** for backend services, contributing to improved response times and more stable production performance.
- Collaborate with cross-functional Agile teams and stakeholders** to analyze requirements, refine user stories, and deliver ADM enhancements within sprint timelines.

### Programmer Analyst Trainee — ADM (Pega / Java Standards)

Aug 2024 – Aug 2025

Cognizant | Kolkata, India

- Configured **Pega flows, flow actions, and UI rules** under senior guidance, supporting delivery of case management enhancements on live applications.
- Contributed to **production support and incident management**, performing root cause analysis using Pega Tracer, Clipboard, and log review to resolve defects and reduce ticket backlog.
- Authored **technical documentation and knowledge-base articles** that accelerated onboarding and standardized troubleshooting for recurring issues.

### Intern — Application Development & Maintenance

Dec 2023 – May 2024

Cognizant | Chennai, India

- Gained hands-on exposure to **enterprise SDLC, ADM practices, and Java development standards** within a live application support environment.

- Developed MFRP Project with **application support tasks, defect triage, and testing**, building a strong foundation in enterprise delivery.

### Subject Matter Expert (Q&A) — Computer Science

Apr 2024 – Feb 2025

**Chegg India** | *Remote, India*

- Resolved technical student queries across programming and computer science topics, delivering clear, accurate explanations and reinforcing core engineering fundamentals.

### Research Intern (Fully Funded)

Oct 2022 – Feb 2023

**Yuan Ze University** | *Taoyuan City, Taiwan*

- Supported research experiments and technical documentation on a fully funded international internship, strengthening analytical and problem-solving skills.
- Learned and used Machine Learning under Prof. Chih Yang Lin.

## KEY ACHIEVEMENTS

---

- Certified across both Pega architecture tiers — **Senior System Architect (CSSA v25) and System Architect (CSA v23)** — validating advanced Pega design and workflow automation capability.
- **Adopted GenAI developer tooling (GitHub Copilot, Claude)** to accelerate coding, debugging, and documentation, boosting individual delivery throughput.

## CERTIFICATIONS

---

- **Certified Pega Senior System Architect (CSSA)**
- **Certified Pega System Architect (CSA) — v23**
- **Anthropic Claude Foundations Certification**
- **GH-300 GitHub Copilot Certification**
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Boomi Associate Integration Developer Certification**
- **Certificate for attending 5-Day AI Agents Intensive Course with Google.**

## EDUCATION

---

### B.Tech, Computer Science & Engineering

May 2019 – May 2023

*Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology, Chennai*

### Secondary School (Physical Sciences)

Apr 2017 – Apr 2019

*Mani Mukunda Secondary School*
