

ASHISH KUMAR KEWAT

Java Developer | Programmer Analyst | Backend Software Engineer

Kolkata, West Bengal, India • ashishkewat370@gmail.com • +91 8009209634 • [linkedin.com/in/ashishkewat370](https://www.linkedin.com/in/ashishkewat370)

PROFESSIONAL SUMMARY

Computer Science graduate and enterprise software developer with 2 years of delivery experience at Cognizant across full-cycle SDLC (Waterfall and Agile/Scrum). Strong foundation in core Java, object-oriented programming, data structures, and RESTful web-service integration, with hands-on work building system-to-system integrations, relational data access over Oracle/SQL, and applying SOLID design and guardrail-based best practices. Experienced in defect management, root-cause analysis, and production support within Agile teams. Seeking a Java / backend developer role to apply object-oriented design, REST API development, and enterprise integration skills to build scalable services.

TECHNICAL SKILLS

Languages: Java (Core Java, OOP), SQL, PL/SQL, Python

Core Java Concepts: Object-Oriented Programming, Collections, Exception Handling, Multithreading (fundamentals), Data Structures & Algorithms, JDBC

Web Services & Integration: RESTful Web Services, REST API design & consumption, JSON, HTTP, Postman, System-to-System Integration, API Mapping

Databases: Oracle Database (12c/Oracle DB), SQL, PL/SQL, Relational Data Modeling, Query Optimization (fundamentals)

Methodologies & Design: SDLC (Waterfall, Agile/Scrum), SOLID Design Principles, OOA/OOD fundamentals, Design & Architecture fundamentals, Estimation & Quality Processes

Tools & DevOps: Git/GitHub, CI/CD (fundamentals), Jira, Eclipse / IntelliJ IDEA, GitHub Copilot, SDLC tooling

Debugging & Support: Root Cause Analysis, Defect Management, Production & Incident Support, Log Analysis, Application Debugging

Enterprise BPM Platform: Pega PRPC (v8.x / Infinity 23) - Case Management, REST Connectors & Services, Data Pages, Decision & Declarative Rules, Guardrails (CSA & CSSA certified)

Cloud & AI: Oracle Cloud Infrastructure (AI Foundations), Applied GenAI developer tooling (GitHub Copilot, Claude)

PROFESSIONAL EXPERIENCE

Programmer Analyst

Aug 2025 – Present

Cognizant | Kolkata, India

- Deliver enterprise workflow-automation features across the full SDLC in an Agile/Scrum team, collaborating with cross-functional stakeholders to analyze requirements, refine user stories, and ship within sprint timelines.
- Design and build REST-based integrations (connectors, services, service packages) for reliable system-to-system data exchange, applying REST/JSON API patterns and integration mappings.
- Configure asynchronous and background processing (queue processors, job schedulers) to improve throughput and reliability of long-running operations.
- Develop reusable, modular components and data-access logic aligned to guardrail and SOLID design best practices, improving reusability and reducing redundant configuration by an estimated 30%.
- Work with Oracle/SQL data sources and structured data handling to support case data and reporting requirements.

Programmer Analyst Trainee — ADM (Pega / Java Standards)

Aug 2024 – Aug 2025

Cognizant | Kolkata, India

- Built application features under enterprise Java development standards and senior guidance, supporting delivery of case-management enhancements on live production applications.
- Contributed to production support, defect management, and incident resolution — performing root-cause analysis via tracing, log review, and debugging to resolve defects and reduce ticket backlog.
- Authored technical documentation and knowledge-base articles that standardized troubleshooting and accelerated onboarding.

Application Development & Maintenance Intern

Dec 2023 – May 2024

Cognizant | Chennai, India

- Gained hands-on exposure to the enterprise SDLC, ADM practices, and Java development standards within a live application-support environment.
- Delivered the MFRP project with application-support tasks, defect triage, and testing, building a foundation in enterprise software delivery.

Research Intern (Fully Funded)

Yuan Ze University | Taoyuan City, Taiwan

Oct 2022 – Feb 2023

- Supported machine-learning research experiments and technical documentation using Python under Prof. Chih-Yang Lin on a fully funded international internship, strengthening analytical and problem-solving skills.

Subject Matter Expert (Q&A) — Computer Science

Chegg India | Remote

Apr 2024 – Feb 2025

- Resolved programming and computer-science queries with clear, accurate explanations, reinforcing core engineering and coding fundamentals.

CERTIFICATIONS

- Certified Pega System Architect (CSA) — v23 | Certified Pega Senior System Architect (CSSA) — v25
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Boomi Associate Integration Developer Certification
- GH-300 GitHub Copilot Certification | Anthropic Claude Foundations Certification
- 5-Day AI Agents Intensive Course with Google (Certificate of Attendance)

EDUCATION

B.Tech, Computer Science & Engineering*May 2019 – May 2023*

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology, Chennai
